## MBAC 2004

M.B.A. DEGREE EXAMINATION, JANUARY 2022.

Second Semester
OPERATIONS MANAGEMENT/OPERATIONS RESEARCH AND MANAGEMENT

Time : Three hours Maximum : 100 marks
PART A- (5 $\times 6=30$ marks $)$
Answer any FIVE questions out of Eight questions.

1. Illustrate the importance of process planning.
2. State the objectives of production planning
3. Explain the different types of inventories.
4. Find initial solution for the following transportation problem using Least Cost method.

|  | D1 | D2 | D3 | D4 |
| :---: | :---: | :---: | :---: | :---: | Availability

5. Solve the following game

Player B

|  |  | B1 |  | B2 | B3 | B4 |  | B5 |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| Player A | A1 | 9 | 3 | 1 | 8 | 0 |  |  |
|  | A2 | 6 | 5 | 4 | 6 | 7 |  |  |
|  | A3 | 2 | 4 | 3 | 3 | 8 |  |  |
|  | A4 | 5 | 6 | 2 | 2 | 1 |  |  |
|  |  |  |  |  |  |  |  |  |

6. In a railway marshalling yard, trains arrive at the rate of 30 trains per day. Assuming that arrival time follows an Poisson distribution and the service time distribution is exponential with an average of 36 minutes. Find the length of the system.
7. Draw a network diagram for the following project

| Job | Immediate |
| :--- | :--- |
|  | predecessors |

| A | - |
| :---: | :---: |
| B | A |
| C | A |
| D | B |
| E | C, D |
| F | E |

8. What is Goal programming? Explain.

MBAC 2004

$$
\text { PART B }-(5 \times 10=50 \text { marks })
$$

Answer any FIVE questions out of Eight questions.
9. Analyse the factors influencing manufacturing plant location.
10. Elucidate the features, advantages and disadvantages of product layout.
11. Discuss the applications of operations research.
12. Solve the following Linear Programming Problem using graphical method.
Maximize $z=5 x_{1}+6 x_{2}$
Subject to the constraints
$2 x_{1}+4 x_{2} \leq 42$
$6 x_{1}+3 x_{2} \leq 90$
$x_{1}, x_{2} \geq 0$
13. Solve the following transportation problem

| O1 | D1 | D2 | D3 | D4 |
| :---: | :---: | :---: | :---: | :---: |
|  | 10 | 7 | 3 | 6 |
| O2 | 1 | 6 | 8 | 3 |
| O3 | 7 | 4 | 5 | 3 |
| 3 |  | 2 | 6 | 4 |

14. Solve the following game using graphical method

> B1 B2

A1 $1 \quad-3$
A2 35
A3 $\quad-1 \quad 6$
A4 41
A5 22
A6 $-5 \quad 0$
15. At a doctor's clinic patients arrive at an average rate of 5 patients per hour. It has been observed the doctor takes an average of 8 minutes per hour. Arrival time is based on Poisson and service is based on exponential distribution. Find
(a) The average number of patients in the doctor's clinic.
(b) The average number of patients waiting for their turn.
(c) The average time that a patient spends in the clinic.

MBAC 2004
16. Find the critical path and the project duration for the following project.

PART C $-(1 \times 20=20$ marks $)$

Case Study (Compulsory Question)
17. A production plant has nine departments and the present layout is shown in the following figure.

| A | D | G |
| :---: | :---: | :---: |
| B | E | H |
| C | F | I |

The movement of materials between the departments is shown in the load summary table below.

| To | B | F | I |
| :---: | :---: | :---: | :---: |
| From | 90 |  |  |
| D | 180 | 200 |  |
| E |  | 90 | 270 |
| $H$ | 630 |  |  |

Obtain a good layout considering the unit costs of movement is Rs. 10 per unit distance per load for all movements.
