

Date: 20-11-2024

 Dept. No.

Max. : 100 Marks

Time: 09:00 am-12:00 pm

SECTION A - K1 & K2 (CO1)

Q.No	Levels	Answer ALL the Questions	(10 x 2 = 20)
1	K1	Identify the types of statistics.	
2		Define mean deviation.	
3		Describe any two properties of correlation co-efficient.	
4		Explain on mutually exclusive events.	
5		Show an example of orthogonal matrix.	
6	K2	State relative frequency.	
7		Tell the range of given observations: 32, 41, 28, 54, 35, 26, 23, 33, 38, 40.	
8		Express the formula of Karl Pearson's direct method of correlation co-efficient.	
9		Give an example for independent event.	
10		Discuss the uses of Cayley Hamilton theorem.	

SECTION B – K3 & K4 (CO2)

		Answer ALL the Questions	(4 x 10 = 40)															
11	K3	Explain the data measurement techniques with example [OR]																
12		Given the following frequency distribution, calculate the arithmetic mean.																
		<table border="1"> <tr> <td>Marks (x)</td> <td>50</td> <td>55</td> <td>60</td> <td>65</td> <td>70</td> <td>75</td> </tr> <tr> <td>No. of students (f)</td> <td>2</td> <td>5</td> <td>4</td> <td>4</td> <td>5</td> <td>5</td> </tr> </table>	Marks (x)	50	55	60	65	70	75	No. of students (f)	2	5	4	4	5	5		
Marks (x)	50	55	60	65	70	75												
No. of students (f)	2	5	4	4	5	5												
13	Find the quartile deviation and the coefficient of quartile deviation for the following data. 23,8,5,16,33,7,24,5,30,33,37,30,9,11,26,32 [OR]																	
14	The Science test scores of five students are: 92,88,80,68 and 52. Find variance and standard deviation.																	
15	K4	Calculate Karl Pearson's coefficient of correlation between the following series by using the actual mean method.																
		<table border="1"> <tr> <td>Husband's Age</td> <td>21</td> <td>22</td> <td>23</td> <td>24</td> <td>25</td> <td>26</td> <td>27</td> </tr> <tr> <td>Wife's Age</td> <td>16</td> <td>15</td> <td>17</td> <td>18</td> <td>19</td> <td>20</td> <td>21</td> </tr> </table>	Husband's Age	21	22	23	24	25	26	27	Wife's Age	16	15	17	18	19	20	21
Husband's Age	21	22	23	24	25	26	27											
Wife's Age	16	15	17	18	19	20	21											
	[OR]																	
16	A bag contains 3 red, 6 white and 7 blue balls. What is the probability that two balls drawn are white and blue?																	

17		Find the Eigen values and Eigen vectors of the matrix																																										
		$A = \begin{bmatrix} 3 & 1 & 4 \\ 0 & 2 & 6 \\ 0 & 0 & 5 \end{bmatrix}$																																										
18		[OR] Illustrate about symmetric, skew symmetric, Hermitian and skew Hermitian with suitable example																																										
SECTION C – K5 & K6 (CO3)																																												
	Answer ALL the Questions																																											
	(2 x 20 = 40)																																											
19	K5	a. Find the median of the following data: (10 Marks)																																										
		<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td>Age</td> <td>20–25</td> <td>25–30</td> <td>30–35</td> <td>35–40</td> <td>40–45</td> <td>45–50</td> <td>50–55</td> <td>55–60</td> </tr> <tr> <td>No. Persons</td> <td>50</td> <td>70</td> <td>100</td> <td>180</td> <td>150</td> <td>120</td> <td>70</td> <td>60</td> </tr> </table>	Age	20–25	25–30	30–35	35–40	40–45	45–50	50–55	55–60	No. Persons	50	70	100	180	150	120	70	60																								
Age	20–25	25–30	30–35	35–40	40–45	45–50	50–55	55–60																																				
No. Persons	50	70	100	180	150	120	70	60																																				
20	K5	b. Calculate population skewness from the following data: 73, 70, 71, 73, 68, 67, 69, 72, 76, 71 (10 Marks)																																										
		[OR]																																										
	Calculate correlation coefficient for bivariate grouped data from the following data.																																											
	K6	<table border="1" style="width: 100%; border-collapse: collapse;"> <tr> <td>Class Y</td> <td>10-20</td> <td>20-30</td> <td>30-40</td> <td>40-50</td> <td>50-60</td> </tr> <tr> <td>Class X</td> <td></td> <td></td> <td></td> <td></td> <td></td> </tr> <tr> <td>15-25</td> <td>6</td> <td>3</td> <td></td> <td></td> <td></td> </tr> <tr> <td>25-35</td> <td>3</td> <td>16</td> <td>10</td> <td></td> <td></td> </tr> <tr> <td>35-45</td> <td></td> <td>10</td> <td>15</td> <td>7</td> <td></td> </tr> <tr> <td>45-55</td> <td></td> <td></td> <td>7</td> <td>10</td> <td>4</td> </tr> <tr> <td>55-65</td> <td></td> <td></td> <td></td> <td>4</td> <td>5</td> </tr> </table>	Class Y	10-20	20-30	30-40	40-50	50-60	Class X						15-25	6	3				25-35	3	16	10			35-45		10	15	7		45-55			7	10	4	55-65				4	5
Class Y	10-20	20-30	30-40	40-50	50-60																																							
Class X																																												
15-25	6	3																																										
25-35	3	16	10																																									
35-45		10	15	7																																								
45-55			7	10	4																																							
55-65				4	5																																							
21	<p>a. Two cards are drawn at random from a well-shuffled pack of 52 cards. Show that the chance of drawing two aces is 1/221. (5 Marks)</p> <p>b. From a pack of 52 cards, three are drawn at random. Find the chance that they are a king, a queen and a knave. (6 Marks)</p> <p>c. Four cards are drawn from a pack of cards. Find the probability that i) all are diamond, ii) there is one card of each suit and iii) there are two spades and two hearts (9 Marks)</p>																																											
22		<p style="text-align: center;">[OR]</p> <p>Test for Cayley- Hamilton theorem for the given matrix and hence find A^{-1}</p> $A = \begin{bmatrix} 1 & -1 & 4 \\ 3 & 2 & -1 \\ 2 & 1 & -1 \end{bmatrix}$
