## LOYOLA COLLEGE (AUTONOMOUS), CHENNAI - 600034

M.Com. DEGREE EXAMINATION - COMMERCE

FIRST SEMESTER - NOVEMBER 2015

## CO 1812-ADVANCED BUSINESS STATISTICS

Date: 03/11/2015
Dept. No. $\square$ Max. : 100 Marks
Time: 01:00-04:00
Part-A
( $10 \times 2$ = 20 marks)
Answer ALL questions. (Use the enclosed Table:'HealingHabitsSurveyData'toanswer Qs. 1 and, 2)

1. a) Identify an ordinal and a nominal variable.
b) What is the 'range' for the variable ' C 1 HealHa '?
2. Calculate the mean value for the variable 'P7Sleep' for 'AGE' values BELOW 35 years.
3. What is 'skewness'?
4. Explain 'alternate hypothesis'.
5. What is ' $Z$ ' distribution.
6. Identify two benefits of a 'Bar Chart'.
7. Explain 'Poisson Distribution'.
8. Explain '2-tailed tests'?
9. Explain $\beta$ error.
10. What is the probability of a card drawn from a pack of cards will be either a 'Diamond' or a 'Queen'?

Part-B
(4×10-40 marks)

## Answer any FOUR questions.

(Use the enclosed Table: 'Healing Habits Survey Data' to answer Qs. 11 and, 16)
11. Develop an interval variable combining B2Excres, B3Nosmok, \& B4Homefd, variables. Code and label it, appropriately ( 2 marks). Calculate its Variance (4 marks). Prepare a frequency table for the variables, 'B1Healif' \& 'B2Exercs and interpret. (4 marks)-PLEASE CHECK DATA TABLE AT THE END.
12. A number of STUDENTS in a popular college were selected at random to investigate their eating habits. The patronage for four Indian cuisines, were verified across three Educational categories. The results of the survey are shown below. Test the hypothesis (level of significance of 0.05) that the choice of Food (Cuisine) taken is independent of Educational (Degree) Type.

| TABLE SHOWING EDUCATIONAL CATEGORY VS. CUISINE TYPE |  |  |  |
| :---: | :---: | :---: | :---: |
| TYPE OF CUISINE | DEGREE TYPE |  |  |
|  | UG | PG | PG PLUS |
| ANDHRA | 73 | 83 | 5 |
| TAMILNADU | 24 | 24 | 64 |
| KERALA | 55 | 7 | 53 |
| NORTH INDIAN | 14 | 54 | 94 |

13. Answer any TWO of the following:
(1)The probability of failure in the Computer practical exams is $40 \%$. If 25 batches of 6 students each take the examination, in how many batches 4 or more students would pass?
(2) A bag contains 2 white and 3 black balls. Four persons J, K, L, and M in the order named each draw one ball and do not replace it. The person to draw a white ball receives Rs 200. Determine their expectations..
(3) What is the probability that a leap year selected at random will contain either 53 Thursdays or 53 Fridays.
14. The average package weight of a restaurant meal (buffet) was 750 gms., with a standard deviation of 200 gms . A random sample of 36 meals were drawn from the restaurant. a) What is the probability that the arithmetic mean of the sample exceeds 600 gms. Interpret the result. b) Find the value of sample arithmetic mean within which the middle $95 \%$ of all sample means will fall.
15. Help the Commissioner of the city Police, by using the Sign Test to check for improvement in Speeding Bikes, 'before' \& 'after' a new Speed Control Program was announced two weeks back.

| Before | 25 | 16 | 36 | 27 | 44 | 33 | 28 | 41 | 51 |
| :--- | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: | ---: |
| After | 21 | 33 | 25 | 17 | 53 | 23 | 38 | 53 | 36 |

16. What is the correlation between 'P5EDUC' and 'P6Income'? (CHECK TABLE AT THE END)
17. a) What is the utility of 'reliability' and 'validity' in Statistics? b)Explain 'Control Charts' and 'Six Sigma'.

## Part-C

( $2 \times 20=40$ marks)

## Answer any TWO questions. <br> (Use the enclosed Table: 'Entrepreneur Details' to answer Qs. 21)

18. The details of various levels of Advertising recorded in three zones in Chennai city are given below. Are there significant differences in Zonal Profits / and Advertisement levels used in the city?

| Advertisements <br> Used | Zonal Profits in Chennai |  |  |
| :---: | :---: | :---: | :---: |
|  | Zone I | Zone II | Zone III |
| Very High | 40 | 56 | 52 |
| High | 44 | 60 | 64 |
| Medium | 52 | 64 | 36 |
| Low | 64 | 40 | 38 |

Test appropriate hypotheses using F-test (you can ask for statistical Tables from your invigilators)
19. Calculate seasonal indices by the Ratio to Moving Average method.

| Year | I Quarter | II Quarter | III Quarter | IV Quarter |
| :--- | :---: | :---: | :---: | :---: |
| 2011 | 86 | 80 | 79 | 81 |
| 2012 | 83 | 76 | 74 | 79 |
| 2013 | 86 | 81 | 81 | 85 |
| 2014 | 88 | 77 | 74 | 80 |
| 2015 | 78 | 73 | 69 | 76 |

20.a. On the basis of observations made on 40 papaya trees, the total correlation of the yield of papaya (X1), amount of seeds (X2); and the amount of medicinal parts (X3) are found to be: 1) $\quad \mathrm{r} 12=0.8 ; \mathrm{r} 13=0.60 ; \mathrm{r} 23=0.6$. Comment on the partial correlation between yield of papaya fruits, and the quantum of seeds, eliminating the effect of medicinal parts.
b. zero order, first order, and second order coefficients
c. Coefficient of Multiple Determination.
21. Using the attached table on 'Entrepreneurship Details':

1. Prepare an appropriate research methodology for testing the results. Do you suggest any model of relationships? If so, identify at least three research propositions you would consider quite relevant to the study. Identify clearly the Dependent and independent variables in your model.
2. Attempt a regression analysis, using 'HEALTHY HABITS' (C1HealHa) as the Dependent variable, and 'AGE' (P1AGE) as the Independent variable. Report the explained variance, unexplained variance and the $R 2$ value.

## Healing Habits Survey Data

| Sno | $\begin{aligned} & \text { P1A } \\ & \text { ge } \end{aligned}$ | P2Gend er | P3Reli gn | P4Resi de | P5Ed uc | P6Inco me | $\begin{aligned} & \text { P7Sle } \\ & \text { ep } \end{aligned}$ | B1Hea lif | $\begin{aligned} & \text { B2Exe } \\ & \text { rcs } \end{aligned}$ | B3Nosm ok | B4Home fd | C1Heall Ha |
| :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: | :---: |
| 1 | 34 | 2 | 1 | 1 | 4 | 2 | 6 | 5 | 5 | 5 | 5 | 15 |
| 2 | 32 | 1 | 3 | 3 | 4 | 3 | 6.5 | 5 | 5 | 4 | 5 | 14 |
| 3 | 24 | 1 | 2 | 3 | 3 | 2 | 9 | 5 | 4 | 4 | 5 | 13 |
| 4 | 33 | 2 | 1 | 3 | 4 | 2 | 7 | 4 | 4 | 5 | 5 | 14 |
| 5 | 52 | 2 | 1 | 1 | 4 | 3 | 6 | 5 | 3 | 1 | 5 | 9 |
| 6 | 36 | 2 | 2 | 2 | 4 | 2 | 6 | 5 | 5 | 5 | 5 | 15 |
| 7 | 56 | 2 | 1 | 2 | 4 | 4 | 8 | 4 | 3 | 5 | 5 | 13 |
| 8 | 38 | 1 | 1 | 3 | 3 | 2 | 8 | 4 | 4 | 5 | 5 | 14 |
| 9 | 58 | 1 | 2 | 2 | 3 | 2 | 7 | 3 | 5 | 3 | 4 | 12 |
| 10 | 62 | 1 | 2 | 2 | 3 | 2 | 6 | 3 | 5 | 1 | 5 | 11 |

## Description of Variables:

| CODE | VARIABLE LABELS |  | CODE | VARIABLE LABELS |
| :--- | :--- | :--- | :--- | :--- |
| P1Age | 1. $\quad$ Age (in Years) |  | The following variables are coded '1' (Strongly Disagree to <br> ' 5 ' $=$ Strongly Agree) |  |
| P2Gender | 2. $\quad$ Gender (1 Male; 2= Female) |  | B1Healif | I have a healthy lifestyle. |
