## LOYOLA COLLEGE (AUTONOMOUS), CHENNAI - 600034

M.A. DEGREE EXAMINATION - ECONOMICS

FOURTH SEMESTER - APRIL 2015

## EC 4813 - PORTFOLIO THEORY AND INVESTMENT ANALYSIS

Date: 20/04/2015
Dept. No. $\square$ Max. : 100 Marks
Time : 09:00-12:00

## Section - A

Answer any Five questions in about 75 words each.

1. Write a short note on stock market?
2. What is meant by short selling? Give an example.
3. Distinguish between Forward contract and Future contract.
4. A portfolio consists of two securities, 1 and 2 in the proportions 0.6 and 0.4. The SD of the returns on securities 1 and 2 are $\sigma_{1}=10$ and $\sigma_{2}=16$. The coefficient of correlation between the returns on securities 1 and 2 is 0.5 . What is the SD of the portfolio return? Interpret the result in a 2 x 2 matrix.
5. List out the assumptions of Capital Assets Pricing Model?
6. If an investor gets a return of $12 \%$ on his investment and the inflation rate is $6.8 \%$, find the real value of return.
7. What is meant by VAR? What are the methods used to measure VAR?

## Section - B

Answer any Four questions in about 250 words each.
8. State the purpose of the equity evaluation. List out models of equity evaluation. Find the intrinsic value of Kinely stock from the given data below using dividend discount model.

Kinley Mineral Water Company is expected to have dividends grow at a rate of $12 \%$ for the next three years. In three years, the price of the stock is expected to be Rs.74.46 lakhs. If Kinley just paid a dividend of Rs. 2.00 lakhs and its level of risk requires a discount rate of $10 \%$.
9. Discuss various components of the Indian financial systems.
10. From the give data, Illustrate the Binomial Option Pricing Model using the given information:
$\mathrm{S}=400, \quad \mathrm{u}=1.5, \quad \mathrm{~d}=0.75 \quad \mathrm{E}=500 \quad \mathrm{r}=125$ and $\mathrm{R}=1.25$
11. Describe Venture Capital by stating its features.
12. (a) From the given data find the value of securities and the total number of runs.

| Period | Unit of Securities | Price of each Securities |
| :--- | :--- | :--- |
| January 2014 | 5000 | 10 |
| February 2014 | 6500 | 9 |
| March 2014 | 4300 | 8 |
| April 2014 | 7500 | 7 |
| May 2014 | 6200 | 6 |
| June 2014 | 5800 | 5 |
| July 2014 | 5300 | 3 |
| August 2014 | 6000 | 4 |

(b) The portfolio consists of 2 securities A and B in the propositions 0.7 and 0.3 respectively. The SD on securities 1 and 2 are $\sigma_{\mathrm{A}}=15, \sigma_{\mathrm{B}}=22$. Given the coefficient of correlation between the returns on securities A and B as 0.5, find the SD of the portfolio.
13. What is meant by financial risk? Make the recommendations to the investors from the given data:

| Particulars | Company A |  |  | Company B |  |  |
| :--- | :---: | :---: | :---: | :---: | :---: | :---: |
|  | Years |  |  | $\mathbf{2 0 1 5}$ | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ |
|  | $\mathbf{2 0 1 3}$ | $\mathbf{2 0 1 4}$ | $\mathbf{2 0 1 5}$ |  |  |  |
| Equity Capital <br> Rs. 10 per <br> share | $20,00,000$ | $20,00,000$ | $20,00,000$ | $10,00,000$ | $10,00,000$ | $10,00,000$ |
| Debt fund <br> (10\% interest) | $10,00,000$ | $10,00,000$ | $10,00,000$ | $20,00,000$ | $20,00,000$ | $20,00,000$ |
| Operating <br> income | $3,00,000$ | $4,00,000$ | $2,00,000$ | $3,00,000$ | $4,00,000$ | $2,00,000$ |
| Earnings per <br> share | 1.0 | 1.5 | 0.5 | 1 | 2 | NIL |

14. From the given data find the arithmetic mean and Variation of company A and B using SD technique, If the A company's return varies from $6 \%$ to $10 \%$ while the B company's return from $4 \%$ to $12 \%$.

| Company A |  | Company B |  |
| :--- | :--- | :--- | :--- |
| $\left(\mathbf{r}_{\mathbf{i}}\right)$ | $\left(\mathbf{P}_{\mathbf{i}}\right)$ | $\left(\mathbf{r}_{\mathbf{i}}\right)$ | $\left(\mathbf{P}_{\mathbf{i}}\right)$ |
| 6 | 0.10 | 4 | 0.4 |
| 7 | 0.25 | 6 | 1.2 |
| 8 | 0.30 | 8 | 3.2 |
| 9 | 0.25 | 10 | 2.0 |
| 10 | 0.10 | 12 | 1.2 |

## Section - C

Answer any Two questions in about 750 words each. $(2 \times 20=40$ Marks)
15. Define Efficient Market Hypothesis (EMH). Discuss the importance and effects of various types of EMH.
16. (a) Describe the Block - Scholes Option Pricing Model by stating its assumptions.
(b) Calculate the value of the call option using B-S formula for the given information:
a. Price of stock now $\left(\mathrm{S}_{0}\right)=80$
b. Exercise Price $(E)=66$
c. Standard deviation of continuously compounded annual returns ( $\sigma$ ) = 0.4
d. Year to maturity $(\mathrm{t})=0.5$
e. Interest rate per annum $=0.20$
(c) The daily prices of the Hero auto stock and the NSE index for the period $1^{\text {st }}$ February 2015 to $15^{\text {th }}$ February 2015 are given below. From the given illustration compute the value of beta.

| Period | NSE Index (X) | Hero Auto (Y) |
| :---: | :---: | :---: |
| 1 stFebruary 2015 | 904.95 | 597.80 |
| $2^{\text {ndFebruary } 2015}$ | 845.75 | 570.80 |
| 3 rdFebruary 2015 | 874.25 | 528.95 |
| 4thFebruary 2015 | 847.95 | 559.85 |
| $5^{\text {th }}$ February 2015 | 849.10 | 554.60 |
| $6{ }^{\text {th }}$ February 2015 | 835.80 | 545.10 |
| $7{ }^{\text {thF }}$ February 2015 | 816.75 | 519.15 |
| $8^{\text {th }}$ February 2015 | 843.55 | 560.70 |
| 9thFebruary 2015 | 835.55 | 560.95 |

| 10thFebruary 2015 | 839.50 | 597.40 |
| :--- | :--- | :--- |
| $11^{\text {th }}$ February 2015 | 852.90 | 600.65 |
| $12^{\text {th }}$ February 2015 | 887.98 | 597.56 |
| 13 th February 2015 | 902.56 | 598.90 |
| 14 th $F e b r u a r y ~ 2015$ | 894.87 | 587.65 |
| 15 ${ }^{\text {th }}$ February 2015 | 885.7 | 594.42 |

(d) Find the expected return and risk of the securities and portfolio from the given data. Also justify the concept of diversification's benefit to investors from the result.

| State of <br> the <br> Economy | Probability | Return <br> on <br> Security <br> A | Return <br> on <br> Security <br> B | Return <br> on <br> Portfolio |
| :--- | :--- | :--- | :--- | :--- |
| E | 0.08 | $10 \%$ | $15 \%$ | $16 \%$ |
| C | 0.12 | $20 \%$ | $16 \%$ | $15 \%$ |
| O | 0.14 | $-5 \%$ | $10 \%$ | $10 \%$ |
| N | 0.17 | $15 \%$ | $-10 \%$ | $12 \%$ |
| O | 0.15 | $8 \%$ | $6 \%$ | $-8 \%$ |
| M | 0.13 | $-10 \%$ | $5 \%$ | $9 \%$ |
| I | 0.06 | $12 \%$ | $-8 \%$ | $7 \%$ |
| C | 0.10 | $-8 \%$ | $13 \%$ | $14 \%$ |
| S | 0.05 | $14 \%$ | $12 \%$ | $-6 \%$ |
